NenoVision

WE'RE HIRING

Marketing & Sales Specialist

BRNO / CZECH REPUBLIC / FULL TIME

We are looking for the right hand of our sales team, someone to take over events and marketing and run them independently.

What you'll do

- **Events and workshops:** 10 to 12 a year, from preparation and invitations to lead capture and follow-up.
- **Content and materials:** website, LinkedIn and newsletters in English, presentations, case studies.
- **Sales support:** materials for our distributors worldwide, leads and data in the CRM, targeted campaigns.
- **Your own projects:** campaigns such as a new product launch, from brief to evaluation.
- **Coordination:** sales, applications, logistics, distributors and event organizers in one project.
- **Systems, not firefighting:** checklists, templates and AI, so that what works can be repeated.

What you bring

- Experience in B2B marketing or sales support, and projects you have taken from brief to result.
- Experience organizing events. You measure success in sales opportunities, not in headcount.
- **Independence:** you ask the right questions, propose solutions and take ownership of them.
- **A hands-on attitude:** a post, a Canva graphic or booth materials. None of it is beneath you.
- Excellent English (ideally C1), including copywriting, and AI as a natural part of your work.
- Curiosity about technology. No technical degree or microscopy background needed, we will teach you.

Why NenoVision

- **Measurable impact:** your events and content turn into demos and orders for instruments worth millions.
- **Technology like no other:** you present LiteScope™ to universities and the semiconductor industry worldwide.
- **The world from Brno:** you prepare events in Europe, the US and Asia from Brno and travel to selected ones.
- **Small team, big responsibility:** around 20 people, little bureaucracy, lots of trust. You help decide how we do things.
- **Onboarding with a plan:** in month one you learn the product and market, by month three you lead your own project.
- **Room to grow:** you can develop the role toward marketing data, performance or demand generation.

The details

- **Location:** Brno, Technology Park
- **Contract:** full time, core hours 9 am–3 pm, home office by agreement
- **Start:** December 2026 or January 2027

> As devices shrink and technology nodes advance, conventional imaging hits its limits. NenoVision combines Atomic Force Microscopy (AFM) with Scanning Electron Microscopy (SEM) through our LiteScope technology, revealing structural, electrical and functional information conventional systems alone can't provide.
